YOUSEF ALSAYED ABDELFATTAH

Junior AI Engineer
yousefabuelkhear@gmail.com • +201153826643 • Cairo, Egypt • linkedin.com/in/yousef-alsayed-abdelfattah • GitHub

Work Experience

AI Software Engineer Remote
Outlier – AI model evaluation and quality assurance platform Nov 2024 – Jan 2025
- Evaluated 50+ LLM responses daily across 6+ domains, identified recurring hallucination and reasoning issues, and delivered structured feedback that improved annotation consistency and model-evaluation quality

Military Service Egypt
Egyptian Armed Forces Engineering Authority– Compulsory national service Jan 2025 – May 2026

Programming Instructor Cairo, Egypt
iSchool – English-speaking coding education platform for K-12 and adult learners May 2026 – Present
- Taught programming fundamentals to 30+ students across 2 beginner cohorts, covering core concepts such as logic, control flow, variables, functions, and basic problem solving

Projects

End-to-End Multi-Agent SDR Pipeline
OpenAI Agents SDK · Groq · Pydantic · Langfuse · SendGrid
- Built an end-to-end sales automation pipeline from prospect research to email delivery using 3 drafter agents, 1 manager agent, and 1 emailer agent, reducing the manual workflow to 4 automated stages
- Added validation and observability layers using Pydantic, schema-based prompting, and Langfuse/OpenTelemetry, improving output reliability and making model traces easier to monitor during debugging
- Integrated 6+ tools and services across the pipeline stack, including search, validation, tracing, and email delivery components, to support end-to-end SDR workflow automation

Advanced Engineering Team — Multi-Agent Code Generator
CrewAI · Groq · Docker · LangFuse
- Built a 4-agent CrewAI pipeline to automate code generation from natural-language specifications across Groq-hosted models
- Developed a Docker-based execution environment for sandboxed runs and test validation, producing a Python module, Gradio interface, and unit tests from natural-language specs with full LangFuse tracing

RAG-AI-Agent — Domain-Specialized Document Intelligence Agent
LangChain · ChromaDB · Hugging Face · Groq · Streamlit
- Built an agentic LangChain RAG system with 4 integrated capabilities: semantic document retrieval, web search, voice playback, and document collection management in a unified Streamlit interface

EgyptianSavoryScout — Fine-Tuned LLM Restaurant Recommender
HuggingFace Transformers · PyTorch · Qwen 1.5B · scikit-learn · FastAPI
- Fine-tuned Qwen 1.5B on a 1,000+ entry dataset and built a TF-IDF + rating ranker for recommendations across 7 Egyptian cities

Education

Misr University for Science and Technology Cairo, Egypt
Bachelor of Science, Mechatronics, Robotics & Automation Engineering June 2024
Graduation Project: R2-WAITER — autonomous restaurant waiter robot built with 4 core technologies: ROS 2, Nav2, Gazebo, and PyQt5

Additional Information

Programming: Python, C, C++, MATLAB
Machine Learning & LLMs: PyTorch, TensorFlow, scikit-learn, Hugging Face Transformers, fine-tuning (QLoRA, PEFT), embeddings, semantic search, RAG systems, LLM evaluation
Agentic AI: LangGraph, LangChain, OpenAI Agents SDK, AutoGen, MCP, multi-agent systems, tool calling, structured outputs,CrewAI
Backend & Deployment: FastAPI, Docker, Git/GitHub, async Python, Streamlit, Gradio
Observability & Monitoring: LangSmith, LangFuse, OpenTelemetry
Model Providers: OpenAI, Anthropic, Google Gemini, Groq, DeepSeek, OpenRouter
Soft Skills: Communication, collaboration, adaptability, teamwork, analytical thinking.
Certifications: AI Engineer Core Track · Agentic AI & MCP · CS50 Intro to CS · CS50 Intro to AI
Languages: English (C2) · Arabic (Native)
