# Yousef Alsayed Abdelfattah

New Cairo,5th settlement, Egypt • yousefabuelkhear@gmail.com • 01153826643 • linkedin.com/in/yousef-alsayed-abdelfattah • github.com/yousefattaff

## EXPERIENCE

**AI Data Specialist | Outlier Scale AI (Freelance, Remote)** *Nov 2024 – Jan 2025*

- Applied Reinforcement Learning from Human Feedback (RLHF) to evaluate LLM outputs, contributing structured feedback that informed model training and alignment.
- Conducted prompt engineering experiments — varying system instructions, context windows, and parameters — and produced detailed quality assessments of model responses.
- Performed QA on analyst submissions covering instruction-following, conversation design, and safety/ethical compliance (harmlessness, truthfulness, safety).

## PROJECTS

**Autonomous Waiter Robot | Graduation Project (Python, ROS1, REST, PyQt5, HTML/CSS/JS)** *2023 – 2024*

- Architected a multi-service system integrating a real-time web UI, a PyQt5 ordering interface, and a ROS1 robotics backend communicating via ROSBridge WebSocket — demonstrating distributed service design.
- Designed inter-service communication between the ordering system and robot state manager, enabling kitchen staff to track robot status and manage orders in real time.

**Metal Detector | IMT AVR Embedded Diploma Project (C, Embedded C, AVR, Eclipse)** *2023*

- Developed firmware for an AVR microcontroller-based metal detection system, integrating DIO, LCD, Motors, LDR, and Ultrasonic HAL drivers from scratch.
- Implemented ISRs, Timers, and UART communication; debugged and optimized firmware in Eclipse for minimal resource consumption on constrained hardware.

**Clinic Management System | CS50X Final Project (C)** *2023*

- Built a command-line clinic management tool in C, applying data structures, algorithms, memory management, and user-input handling to manage patient records efficiently.

## EDUCATION

**B.Sc. Engineering | Misr University for Science and Technology — Giza, Egypt** *Graduated June 2024 | GPA: 3.33*

*Military Service obligation fulfilled.*

## CERTIFICATIONS & TRAINING

| | |
|---|---|
| LLM Engineering – AI Core Track \| Ed Donner | *Jan – Mar 2026* |
| CS50's Introduction to Artificial Intelligence with Python \| Harvard (edX) | *Jun – Oct 2025* |
| Diploma in AVR Embedded Systems \| IMT (Information Technology Institute) | *2023* |
| CS50X: Introduction to Computer Science \| Harvard (edX) | *2023* |

## TECHNICAL SKILLS

**LLM & AI:** OpenAI API, LangChain, RAG concepts, Prompt Engineering, RLHF, TensorFlow, NumPy, Matplotlib, OpenCV
**Backend & APIs:** Python, Flask, REST API design, Node.js (learning), TypeScript (learning), HTML/CSS/JavaScript
**Embedded Systems:** AVR (ATmega), Embedded C, DIO/HAL drivers, ISR, Timers, UART, Eclipse, Arduino IDE
**Cloud & Tooling:** AWS (foundational), Git, VS Code, PyCharm, Postman
**Languages:** Python, C, C++, JavaScript
