YOUSEF ALSAYED ABDELFATTAH

Applied AI Engineer | Mechatronics & Embedded Systems
New Cairo, Egypt | +201153826643 | yousefabuelkhear@gmail.com | LinkedIn: yousef alsayed abdelfattah

PROFESSIONAL SUMMARY

Mechatronics graduate with experience in LLMs, RLHF, RAG, QLoRA, and agentic AI. Proficient in Python and C with a strong foundation in algorithms, ethical AI, and software development. Passionate about building fair, transparent AI solutions aligned with responsible deployment standards.

EXPERIENCE

AI Data Specialist | **Outlier Scale AI (Freelance)** *Nov 2024 – Jan 2025 | Remote*

- Applied RLHF to evaluate 100+ LLM responses, improving alignment, safety, and ethical output quality.
- Reviewed edge-case outputs against legal, ethical, and policy requirements — building awareness of bias and fairness in AI.
- Designed 20+ prompt engineering variations and QA-reviewed 50+ analyst submissions with structured feedback reports.

PROJECTS

Autonomous Waiter Robot — Control App | **PyQt5 · ROS · WebSockets · LangChain Agents** *2024 |*

- Built a full-stack PyQt5 desktop app for an autonomous robot with real-time order routing and task monitoring via WebSockets & ROS.
- Integrated an AI agent layer (LangChain) for multi-step reasoning, tool use (menu lookup, kitchen status), and autonomous exception handling.

AVR Embedded Systems Project | **C · RTOS · AVR MCU** *2023 |*

- Implemented embedded C firmware with modular design, RTOS scheduling, and clean, well-documented code following software engineering best practices.

EDUCATION

B.Sc. Mechatronics Engineering | Misr University for Science and Technology *Jun 2019 – Jun 2024 | GPA: 3.3/4.0*
Relevant: Robotics, Embedded Systems, Computer Vision, Signal Processing, Algorithms

CERTIFICATIONS

AI Engineer Core Track (LLMs, RAG, QLoRA, AI Agents, LangChain) — Ed Donner / Udemy | **CS50 AI with Python** — HarvardX | **CS50 Intro to Computer Science** — HarvardX | **Full Embedded Systems Diploma** — IMT School

TECHNICAL SKILLS

AI / ML	LLMs, RLHF, Prompt Engineering, RAG, QLoRA, AI Agents, LangChain, Computer Vision, NLP
Programming	Python (Advanced), C (Advanced), C++ (Intermediate), JavaScript (Familiar)
Tools	Git, Docker, ROS, PyQt5, WebSockets, React — Agile / JIRA (familiar)
Ethical AI	Bias & fairness evaluation, RLHF safety review, policy-compliant model assessment

Languages: Arabic — Native | English — C2 (Fluent)
