AI Engineer | AI Automation

EXPERIENCE

AI Engineer, Arche Robotics July 2026 – Present
Remote

- Cut fleet-log capture from 30 minutes to about 0.3 seconds by replacing polling with DynamoDB Streams on AWS Lambda, a reduction of more than 99%.
- Added a six-stage skip ladder so Groq runs only when a robot log needs a model, and shipped fixes for nine production issues, including a nested MCP payload and battery watchdogs.
- Validated the agent with 265 Pytest unit tests and 13 live-stream smoke tests.

Programming Instructor, iSchool May 2026 – Present
Cairo, Egypt

- Teach Python, artificial intelligence, JavaScript, and interface design in English to 30+ students in Grades 1–12.

AI Software Engineer, Contractor, Outlier November 2024 – January 2025
Remote

- Evaluated 50+ large language model answers a day across 6+ domains, wrote 20+ prompt variants to expose weak reasoning, and reviewed 50+ analyst submissions for a human-feedback workflow.

PROJECTS

SDR Multi-Agent Python, OpenAI Agents SDK, Tavily, SendGrid

- Built a sales pipeline that stops on a personal name, runs 3 company searches in parallel, writes 3 email styles, and sends the chosen email through SendGrid.

Advanced Engineering Team CrewAI, Groq, Docker, Langfuse

- Built a 4-agent crew that turns one software request into a design, Python, a Gradio demo, and tests, and can run the generated code in Docker.

RAG-AI-Agent LangChain, ChromaDB, Groq

- Built a document assistant that stores each PDF set in its own Chroma collection and cites the file and page. Search keeps the top 4 of 24 candidate chunks.

SKILLS

Python, large language models (LLMs), retrieval-augmented generation (RAG), multi-agent systems, CrewAI, OpenAI Agents SDK, Groq, LangChain, ChromaDB, FastAPI, Docker, AWS Lambda, DynamoDB Streams, Model Context Protocol (MCP), Pytest, Langfuse, prompt engineering, reinforcement learning from human feedback (RLHF), Git

EDUCATION

Bachelor of Science, Mechatronics, Robotics, and Automation Engineering CGPA 3.34
Misr University for Science and Technology, Cairo September 2019 – June 2024

- Graduation project: built the operator interface that sent ROS navigation goals so a restaurant robot moved from table to table. Team of six. Third place, International Gathering of Artificial Intelligence in Egypt.

ADDITIONAL

Languages: Arabic (native), English (professional).
National service: IT Help Desk, Egyptian Armed Forces Engineering Authority, Giza, January 2025 – March 2026.
Certifications: Proficient AI Engineer, Ed Donner (2026); Machine Learning Specialization, Stanford Online and DeepLearning.AI; CS50's Introduction to Artificial Intelligence with Python, Harvard.
